Objective

Motivated and passionate newcomer with a solid background in computer science and engineering, keen to utilize my technical knowledge and problem-solving abilities in a professional situation. Committed to constant learning, team success, and providing creative solutions to real-world problems. I'm looking forward to starting my career with a vibrant business that supports growth and innovation.

Education

B.E – Computer Science and Engineering – Hindusthan Institute of Technology 2021-2025 | Coimbatore

Current CGPA :8.14

HSC - Raj Vidyalaya Matric Higher Sec School

2020-2021 | Mayiladuthurai

Percentage - 88.83%

SSLC - Raj Vidyalaya Matric Higher Sec School

2018-2019 | Mayiladuthurai

Percentage - 89.2%

Technical Skills

Programming Language:

Java, Python

DataBase Management:

SQL, ETL

Data Visualization Tools:

Power BI

Web Development:

HTML, CSS, JavaScript

Tools & platforms:

Git, Github

Testing:

Manual Testing, STLC, SDLC, Selenium(basic)

Projects

1. MedCaptionNet: Contextual Image Captioning with Deep Learning

Final Year Project | Jan 2025 – Present

- Developed a medical image captioning system using ResNet-50, Dense Attention, and LSTM.
- Trained on the Indiana Chest X-ray dataset to generate accurate contextual medical captions.
- Technologies:** Python, TensorFlow, OpenCV, Google Colab

2. Business Insights Dashboard – Power BI (SN CORP)

Feb 2024 – Mar 2024

- Created an interactive dashboard in Microsoft Power BI to analyze sales, costs, and profits by region, customer, and product subcategory.
- Enabled clear visualization of business KPIs over time, supporting performance monitoring and strategic planning.
- Tools Used:** Power BI, DAX, Data Modeling

3. IoT-Based Automated Solar Grass Cutter

Sept 2023 – Dec 2023

- Designed a solar-powered, sensor-integrated grass cutter system.
- Enabled real-time IoT monitoring with a 40% reduction in energy costs.
- Technologies:** Arduino, C++, IoT Modules

Hands-on Experience

1. Sample Web Application Testing (Academic Practice)

- Wrote test scenarios and test cases for a login and registration module
- Performed UI and functional testing
- Logged defects using Excel and JIRA format

Certifications

- Microsoft Power BI - Infosys Springboard
- SQL (Basic, Intermediate, Advanced) – HackerRank
- SQL for Developers, Data Analysts & BI (MySQL) -Udemy
- Introduction to java- an intractive way - Infosys Springboard
- Python Foundation Certification - Infosys Springboard
- Software Testing Fundamentals – Great Learning

Workshop & Internship

- **Power BI Intern – Cognifyz Technologies**
Worked on interactive dashboards, trend analysis, and business intelligence solutions using Power BI.
- **Campus Ambassador Intern – Amypo Technologies Pvt Ltd**
Represented the company in academic environments, assisted in tech event promotion and branding activities.
- Cyber security and ethical hacking awareness workshop-NCIIPC India (A unit of NTRO)
- Power BI Mastery Workshop – Office Master
- **MERN Stack Workshop – Amypo Technologies Pvt Ltd**

Achievements

- Publish Journal in Advanced Journal of Zoology (**Revolutionizing Lawn Care AI-Driven Solar-Powered Humorless Grassland Mover With IoT Integration**)
- Presented at the TESS-2023 International Conference at Taylor’s University, Malaysia.
- Completed 48 hours CTF Challenge in PENTATHON 2024 conducted by NCIIPC

Declaration

I hereby declare that the details furnished above are true to the best of my knowledge and belief.
