PROFILE

To obtain a responsible position as a Manual Tester, utilizing my 4 years of experience in test planning, execution, and defect management to enhance software quality and support continuous product improvement.

SKILLS

Postman | Jira | Agile | Mobile Testing | IOS | Manual Testing | Functional Testing | Regression Testing | Smoke Testing | Sanity Testing | Integration Testing | System Testing

SUMMARY

- Proficient in manual testing of web and mobile applications to ensure functionality and performance.
- Strong experience in functional, regression, smoke, sanity, and system testing.
- Skilled in preparing test scenarios, test cases, and test execution reports.
- Experienced in defect identification, reporting, and tracking using tools like JIRA and ALM.
- Hands-on experience in API testing using Postman for validating request and response parameters.
- Good understanding of SDLC, STLC, and Agile/Scrum methodologies.
- Experienced in User Acceptance Testing (UAT) and coordinating with stakeholders for validation.
- Knowledge of SQL for performing backend database testing and data verification.
- Proficient in cross-browser testing on Chrome, Firefox, and Edge.
- Ability to work collaboratively in Agile teams and participate in daily stand-up and sprint meetings.
- Excellent in defect analysis, root cause identification, and retesting for resolution verification.
- Strong analytical, problem-solving, and communication skills ensuring effective test delivery.

PROFESSIONAL EXPERIENCE

Jan 2022 – Jul 2024	Askan Technologies
May 2018 – Apr 2021	Lumina Datamatics Ltd.
Nov 2024 – Present	Cameo Corporate Services Limited

PROJECTS

Project Name: Kerala Ayurveda

Description: Kerala, often referred to as the cradle of Ayurveda, holds a unique position in preserving and practicing this ancient system of medicine. With a history spanning over 5,000 years, Ayurveda in Kerala is not just a healing system but a way of life deeply rooted in nature and tradition. This project aims to explore, document, promote, and potentially commercialize Kerala's Ayurvedic heritage for health, wellness, education, and sustainable tourism.

Roles and Responsibilities:

- Analyzed business requirements and functional specifications to create detailed test scenarios and test cases for web-based modules of the Kerala Ayurveda application.
- Performed functional, regression, and integration testing to validate end-to-end workflows across multiple modules like user registration, appointment booking, and product purchase.
- Conducted manual testing to ensure all functionalities worked as intended, with special focus on usability, data validation, and consistency across web interfaces.
- Validated API responses using Postman, ensuring proper data retrieval, response codes, and integration between frontend and backend systems.
- Executed database validation using SQL queries to verify data integrity, accuracy, and consistency across tables after API and UI transactions.

- Logged, tracked, and prioritized defects in JIRA, coordinating closely with developers to ensure timely resolution and retesting.
- Participated in integration testing between the Ayurveda booking module, user profile, and payment gateway systems to verify seamless data flow.
- Performed regression testing after every build and deployment to confirm that previously developed functionalities remained unaffected.
- Collaborated with the QA team and developers in Agile sprint meetings, contributing to test planning, review sessions, and defect triage discussions.
- Maintained proper documentation of test cases, test results, and defect reports for each release cycle to ensure full traceability and quality assurance.

Project Name: XYZ Reptiles

Description: XYZ Reptiles is an innovative e-commerce platform specializing in reptiles, reptile supplies, and exotic pet care products. The platform enables users to browse, purchase, and learn about reptiles with a focus on secure transactions, detailed product listings, and high performance across devices.

Roles and Responsibilities:

- Collaborated with business analysts and developers to thoroughly understand e-commerce workflows and key functional areas before preparing test coverage.
- Designed and executed manual test cases to validate product listing, search functionality, cart operations, secure checkout, and order management processes.
- Conducted functional, regression, and integration testing across multiple modules to ensure stability and reliability of core application features.
- Performed UI and usability testing to confirm proper layout alignment, responsiveness, and intuitive navigation across various browsers and devices.
- Verified complete order-to-delivery workflow, ensuring accuracy in pricing, payment confirmations, and transaction records.
- Executed database testing using SQL queries to validate backend data consistency and proper linkage between product, order, and customer tables.
- Used JIRA to track, prioritize, and manage defects, collaborating closely with the development team for issue resolution and retesting.
- Conducted regression testing after each deployment to ensure that existing functionalities remained unaffected by new changes.
- Supported cross-browser and cross-platform testing to validate consistent performance on desktop, tablet, and mobile environments.
- Engaged actively in Agile sprint activities, providing inputs on test estimation, risk assessment, and sprint planning for timely delivery.
- Assisted in UAT coordination, helping business stakeholders validate application readiness for production.

Project Name: Firebird Loan Application

Description: Firebird is a mobile-first loan application designed to simplify and accelerate the personal loan process through a fully digital, user-centric experience. The app allows users to apply for loans, get instant eligibility checks, track loan status, and manage repayments—all from their mobile device. Built with modern fintech integrations and robust security features, Firebird aims to empower underserved and digitally savvy borrowers with easy access to credit.

Roles and Responsibilities:

- Performed functional and end-to-end testing of the mobile loan application, ensuring accuracy in loan eligibility, EMI calculation, interest rate display, and payment workflows.
- Conducted manual regression testing across multiple release cycles to verify system stability after new feature integrations and bug fixes.
- Performed backend testing using SQL queries to validate data integrity across loan accounts, customer records, and transaction histories.
- Verified integration between front-end, middleware, and backend systems to ensure accurate data flow across services such as KYC verification, loan status updates, and repayment schedules.
- Logged, tracked, and monitored defects using JIRA, providing clear descriptions, steps to reproduce, and severity classification to assist developers in efficient debugging.
- Participated in Agile ceremonies (sprint planning, daily stand-ups, and retrospectives) to align testing activities with development timelines and ensure timely delivery of quality builds.
- Performed sanity and smoke testing after each build deployment to confirm application readiness for further testing and production release.
- Documented test results, execution status, and defect reports, contributing to transparent and traceable QA processes.
