SUMMARY

Full Stack Developer with 2.9 years of hands-on experience in building software products, enhancing, and maintaining web applications using **PHP frameworks such as Laravel and CodeIgniter**. Strong expertise in **MySQL database design and optimization** to ensure performance, scalability, and data integrity. Experienced in **developing REST APIs, AJAX-based features, and role-based modules**, along with effective debugging and performance tuning. A collaborative team player who delivers **clean, efficient, and scalable solutions** in fast-paced, agile environments.

TECHNICAL SKILLS

Back End : PHP, Yii, Laravel, CodeIgnitor, Node JS
Front End : HTML, CSS, Bootstrap, Javascript, JQuery, Ajax, React JS
Database : MySQL, MongoDB
Tools : Git, REST APIs, Postman

PROFESSIONAL EXPERIENCE

Junior Software Developer at TalentHive, Chennai	January 2025 – Present
Junior Software Developer at ONEMODO TECHNOLOGIES, Chennai	June 2023 – January 2025

PROJECTS

Junior Software Developer at TalentHive, Chennai	January 2025 – Present
HRMS Product	Apr 2025 - Tiill date

Developed comprehensive HRMS + ERP application from scratch using PHP/Laravel and MySQL delivering integrated workforce and business management platform.

Tool Used: PHP 8.3, Laravel 11, Javascript, Bootstrap, JQuery, Ajax, MySQL, GitLab
Key Modules Built:

- **Dashboard:** Real-time analytics, metrics on : Employees, Clients, Vendors, Attendance, business performance overview (Quotations & Invoices)
- **Employees:**
 - Onboarding & Offboarding
 - Profile management – Personal Details, Compliance, Education, Experience, Family,
 - Miscellaneous, Bank, Salary, Advances and Documents

- **Attendance Management:** shift rostering, clock-in/out tracking
- **Leave Management:** Approval workflows, leave calculations, balance tracking
- **Quotation & Invoice:** Quotations, automated invoicing, payment tracking
- **Inventory Management:** Stock tracking, reorder alerts, vendor management,
- **Reports:** HR, Employees, Business reports – Vendor, Payments, Quotations Invoices etc
- **Common Settings:** System configuration, user roles, notification preferences
- **Role Based Access:** implemented RBAC based on the user profiles.
- **APIs:** Developed REST APIs for mobile app development.

DB Optimization

Jan 2025 – Mar 2025

The client is from Engineering Industry and they had multiple in house developed **applications like – Accounting, HRMS and CRM**. Over the years of usage, the client faced severe performance (slowness) issues across the screens and reports in the applications.

Tool Used: PHP 7.3, Laravel 10, CodeIgniter 3&4, Javascript, Bootstrap, JQuery, Ajax, MySQL

Roles and Responsibilities:

- Initiated a detailed study of the screens and reports where the slowness issues occurred.
- At code level, optimized JQuery and Ajax.
- Implemented pagination instead of data table in the UI.
- Migrated long queries to Multi JOINS in the code.
- Designed and implemented composite indexes on high-traffic tables and reducing query execution time to a larger extent of HRMS modules and Reports.
- Migrated from single-column to multi-column indexes, wherever required.

Junior Software Developer at ONEMODO TECHNOLOGIES, Chennai

June 2023 – January 2025

Tool Used: PHP 7.3, Laravel, Yii, Javascript, Bootstrap, JQuery, Ajax, MySQL

Roles and Responsibilities:

- Contributed to the development and enhancement of an existing **ERP-based Quarry Management System** supporting daily business operations.
- Designed and maintained **Accounting modules, handling ledgers, vouchers, payments, and financial transaction records**.
- Developed Incoming and Outgoing Invoice modules, ensuring accurate billing, tax calculations, and data consistency.
- Implemented Inventory management features to track stock movement, material inward/outward, and quantity reconciliation.
- Integrated third-party e-Invoice APIs to automate invoice generation, validation, and compliance with statutory requirements.
- Developed and integrated SMS notification services for invoice alerts, payment reminders, and operational updates.
- Worked with PHP frameworks (Laravel, Yii) to implement scalable and maintainable backend functionality.
- Optimized MySQL queries and database structure to improve application performance and reduce response time.
- Identified, debugged, and resolved production issues, improving system stability and user experience.
- Collaborated with senior developers and cross-functional teams in requirement analysis, code reviews, testing, and deployment.

EDUCATION

Master of Computer Applications (MCA)

2021 – 2023

NMC College of Arts Science, Trichy

Bachelor of Science in Computer Science (B.Sc)

2018 – 2021

SVM College of Arts & Science, Salem

INTERNSHIP & PROJECTS

Web Development Intern - UNITED TECHNOLOGIES

Jan 2023 – March 2023

- Completed a 3-month sinternship focused on front-end web development using HTML, CSS, and JavaScript.
- Learned to create responsive, user-friendly web interfaces and gained hands-on experience in building static and dynamic web pages.
- Developed small modules and assisted in maintaining UI consistency across web platforms.
- Strengthened understanding of client-side scripting and layout optimization

Final Year Project – Web-Based Milk Society Management System

Technologies: HTML, CSS, JavaScript, PHP, MySQL, WAMP

- Designed and developed a complete web application to manage daily operations of a milk society, including member registration, milk collection tracking, payment calculation, and report generation.
- Used PHP and MySQL for backend logic and database integration, ensuring secure data handling and accurate record-keeping.
- Implemented user roles (admin, members), login authentication, and dynamic dashboards for real-time data access.
- Focused on usability, database normalization, and error handling to ensure a smooth user experience.
