SUMMARY

Android Developer with 1 year of experience building and maintaining Android applications using Kotlin and MVVM architecture. Experienced in Firebase Realtime Database integration, real-time data synchronization, REST API consumption, Room database management, barcode scanning, and Wi-Fi/Bluetooth printing workflows. Focused on writing maintainable code and delivering stable, performance-oriented mobile applications.

TECHNICAL SKILLS

Programming Languages: Kotlin, Java, SQL (SQLite / Room), XML

Architecture & Components: MVVM, ViewModel, LiveData, Jetpack Navigation, Material Design

Backend & Networking: Firebase Realtime Database, Firebase Authentication, REST APIs, Retrofit, OkHttp

Tools & Libraries: Android Studio, Git, GitHub, Barcode / QR Libraries (ZXing)

PROJECTS

Collaborative Todo List Application (Firebase)

Android Application

- Developed a collaborative Todo List Android application using Kotlin and MVVM architecture
- Implemented Firebase Authentication for user login and session handling
- Integrated Firebase Realtime Database to enable real-time task creation, updates, and synchronization
- Enabled task sharing between users with instant UI updates using LiveData and RecyclerView DiffUtil
- Implemented push notifications using Firebase Cloud Messaging (FCM) for task updates

Barcode Application

Barcode-Based Label Design and Printing Application

- Built a barcode-based Android application with dynamic UI elements including editable text, shapes, and layout components
- Integrated barcode, QR code, and data matrix generation features
- Implemented Excel import and local data persistence using Room database
- Added image and PDF upload functionality to support document workflows
- Implemented Wi-Fi and Bluetooth printing for multiple printing environments

EXPERIENCE

Android Developer – Codentrix Technologies Private Limited

Chennai

End-to-End Automation and Technology Solution Provider

November 2024 – Present

- Developed and maintained 7 internal Android applications using Kotlin aligned with business workflows
- Implemented product listing, editing, barcode scanning, and printing modules
- Designed features such as undo/redo, save and refetch logic, and local data persistence using Room
- Resolved application crashes and improved performance through debugging and testing

EDUCATION

B. S. Abdur Rahman Crescent Institute Of Science And Technology

Chennai

Bachelor of Technology – Computer Science and Engineering

2021 – 2024
