Career Summary

Full Stack Developer with 4 years 4 months of experience delivering scalable, responsive web applications. Proficient in React Js, Angular and Flutter. Adept at building user-centric interfaces, integrating RESTful APIs, and leading module development in agile teams.

Technical Skills

- **Frontend:** React Js, Angular (v.16), Flutter
 - **Languages:** JavaScript (ES6+), HTML5, CSS3, TypeScript, Dart
 - **Backend/API:** .NET Core, Web API, REST APIs, SQL Server
 - **Tools:** Git, GitHub, JIRA, Bugzilla, Jenkins
-

Professional Experience

Senior Software Engineer

Rubix Cloud Technologies | 2021 – 2025

- Developed and maintained scalable B2B and B2C web applications using Angular, improving performance and user experience.
 - Designed and integrated RESTful APIs using .NET Core and SQL Server, ensuring secure and efficient data flow.
 - Led frontend development of ezHour (HRMS platform), delivering core modules including Timesheets, Leave Management, and Employee Management.
 - Architected and built a Project Management System (PMS) to streamline task tracking, assignment, and team collaboration.
 - Implemented role-based access control (RBAC) across HRMS and PMS applications to enhance security and user management.
 - Ensured high code quality through GitHub-based version control, code reviews, and JIRA-driven sprint planning and tracking.
 - Collaborated closely with product owners, designers, and backend teams to deliver reliable, business-ready solutions.
-

Project Experience

ezHour – Timesheet Management System | 2024 – 2025

- Developed a responsive Single Page Application (SPA) using Angular, supporting large-scale HR operations.
- Implemented lazy loading and module optimization, significantly reducing initial load time and improving performance.

- Integrated Angular Material to deliver a consistent, accessible, and mobile-friendly user interface.
 - Collaborated with backend teams to ensure seamless API integration and reliable data handling.
-

Project Management System (PMS) | 2024

- Designed and developed a full-stack task and project management platform using Angular and .NET Core.
 - Implemented core features such as task creation, assignment, tracking, and status management, improving team productivity.
 - Optimized SQL Server queries and indexing, resulting in faster data retrieval and improved system responsiveness.
 - Ensured role-based access and secure workflows across project modules.
-

Glamz – Salon Management Platform (B2B & B2C) | 2021 – 2024

- Built a scalable Angular-based salon management platform supporting both B2B and B2C users.
 - Designed reusable UI components and implemented NgRx for efficient and predictable state management.
 - Migrated legacy code to TypeScript, improving maintainability and reducing runtime bugs.
 - Enhanced mobile responsiveness and implemented secure authentication and authorization.
 - Mentored junior developers, conducting code reviews and promoting Angular best practices.
-

Education

B.E. in Computer Science

Government College of Engineering, Srirangam (Anna University) | **2015 – 2018**

Languages

- English (Fluent)
- Tamil (Fluent)
