SUMMARY

Experienced Senior Software Tester with 4 years at Logic Research Labs, skilled in manual testing, bug identification, and ensuring software quality. Proficient in tools like JIRA and MySQL, with a strong focus on functional, regression, and performance testing. Demonstrates excellent attention to detail and a collaborative approach to working with cross-functional teams, consistently delivering high-quality software within tight deadlines.

WORK EXPERIENCE

Senior Software Tester

Logic Research Labs, Tamil Nadu, India

Dec 2024 – Present

- Led manual testing efforts focused on functional, regression, and performance testing.
- Created and executed test cases, tracked bugs, and maintained test documentation.
- Collaborated with developers and analysts to ensure software met user requirements.
- Participated in Agile sprints and daily standups.
- Used MySQL SQL queries and CRUD operations to validate application data during manual testing.
- Performed basic API testing using Postman for web applications to validate request/response behavior, status codes, and data accuracy.

Projects:

- Hospital & Pharmacy Integrated Software – Tested billing, inventory, stock, and prescription workflows.
- Token Management System – Validated token flow, queue updates, and display integration.
- Website Testing – Performed UI, functionality, responsiveness, and regression checks.

Software Tester

Logic Research Labs, Tamil Nadu, India

Dec 2021 – Nov 2024

- Conducted comprehensive manual testing and maintained defect tracking sheets.
- Participated in test case design and execution to ensure product quality.
- Assisted developers in debugging and resolving defects.
- Supported test strategy creation and detailed reporting.
- Performed basic API testing using Postman for web applications to validate request/response behavior, status codes, and data accuracy.

Projects:

- Asset Management Software – Tested asset movement, tracking, and depreciation flows.
 - Nurse Call & Face Attendance App – Validated UI, alerts, and data synchronization.
 - Loyola Publication Billing App – Tested billing flows, data sync, reports, and backend API responses
 - POS & Payroll Software – Validated payroll, attendance integration, and POS transactions.
-

Skills

- Manual Testing, Functional Testing, Regression & Performance Testing, Test Case Design & Execution, Agile Methodology
 - Requirements Analysis, Test Documentation & Planning, MySQL, Version Control (Git)
-

Education

July 2017 - May 2020

Bachelor of Computer Applications (BCA) - Bharathidasan University
