SUMMARY

Software Test Engineer with 3+ years of experience in functional, regression, and end-to-end testing across web, mobile, and desktop applications. Skilled in preparing detailed test cases, executing test scenarios, identifying defects, and collaborating with development teams for quality releases. Strong in requirement analysis, documentation, and Agile methodology. Consistently ensures complete test coverage and high-quality deliverables.

WORK EXPERIENCE

Senior Software Test Engineer – Logic Research Labs

Feb 2023 – Present

- Performed functional, regression, smoke, and UI testing across web, mobile, and desktop applications.
- Designed, executed, and reviewed detailed test cases based on requirements and user stories.
- Identified defects, assigned severity/priority, coordinated with developers, and validated fixes. Prepared test reports, maintained documentation, and supported UAT during release cycles.
- Testing Automation for Hospital management system billing

PROJECTS

- Hospital & Pharmacy Software: Tested billing, OP/IP flow, inventory, prescription, and reporting modules.
 - Asset Management Software: Validated asset creation, movement tracking, and depreciation workflows.
 - POS Billing & Payroll: Checked billing flow, payment modes, discounts, payroll integration, and reports.
 - Nurse Call, Face Attendance & Token System: Tested alerts, data sync, UI, notifications, and workflow accuracy.
-

Skills

- Manual Testing, Functional Testing, Regression Testing, Test Case Design & Execution, UAT, Test Documentation, Requirements Analysis
 - Web & Mobile App Testing, MySQL (Basic Queries), Defect Reporting, Agile, UI & Usability Testing
 - Penetration testing using burpsuite tool
 - Automation using JavaScript
-

Education

July 2018 - May 2022

B.E. Computer Science and Engineering – Arasu Engineering College
