PROFESSIONAL SUMMARY

Results-driven QA Automation & Manual Tester with over 3 years of experience in SaaS environments. Dedicated 1.5 years to specializing in software quality assurance, leveraging technical acumen in Jira, Selenium, and Postman to drive product delivery. Proven ability to translate customer needs into technical test cases, ensuring high-quality product adoption and maximum value for key accounts.

EXPERIENCE

Neurealm

Product Consultant/QA Test Engineer (02/2023-10/2025)

- Led end-to-end testing efforts, ensuring product excellence through a combination of Manual, Functional, and Regression testing
- Utilized Selenium for automated regression suites and Postman for API validation, ensuring seamless integration of new changes into project workflows
- Expertly managed the bug lifecycle using Jira, performing Gap Analysis to identify and resolve software issues before deployment
- Served as a trusted partner to key accounts and stakeholders, ensuring customers achieved maximum value and satisfaction from the product
- Served as the Single Point of Contact (SPOC) for key accounts, conducting demos and gathering yearly feedback to align the product roadmap with user needs
- Proven ability to translate customer needs into product insights

Servicedesk Engineer (04/2022-02/2023)

- Provided Tier 1 Technical Support to end-users via Phone, email and ticketing systems and resolving 85% of issues on first contact
- Diagnosed and resolved software and network issues
- Managed User accounts, permissions and password resets in Active Directory and Microsoft Azure
- Created and Updated Knowledge base articles to improve team efficiency
- Supported remote users using tools like Remote Desktop and Team Viewer
- Leverages a strong foundation in Tier 1 Technical Support and Data Analysis to ensure product excellence and customer satisfaction
