PROFESSIONAL SUMMARY

Flutter Developer with 1+ years of experience in building scalable cross-platform mobile applications for Android and iOS. Skilled in Clean Architecture and BLoC/Cubit state management, with hands-on experience integrating REST APIs and Firebase services to deliver production-ready fintech solutions. Experienced in mobile app deployment, API integration, and performance optimization for real-world applications.

TECHNICAL SKILLS

Languages: Dart, Python, SQL.

Frameworks: Flutter(Android & iOS), Django REST Framework.

Architecture & State Management: Clean Architecture, BLoC/Cubit, Provider.

API & Integration: REST API, Postman.

Tools: Git, Android Studio, VS Code, MySQL Workbench.

EXPERIENCE

Software Developer | Flattrade Broking Private Limited

Mar 2025 - Present, Chennai, India

- Developing and maintaining production-grade Flutter applications used by real users in the fintech trading domain.
- Primarily focused on developing NOVO By Flattrade, a cross-platform fintech trading application (Mutual Funds(Lumpsum, SIP), IPO, GSec, SGB) using Flutter, deployed on Android (Play Store) and iOS platforms.
- Implemented Clean Architecture with BLoC/Cubit and Provider for state management to build scalable, maintainable Flutter features and ensure efficient state handling across the application.
- Integrated secure REST APIs for real-time trading data synchronization and financial transaction processing.
- Successfully completed SIP and SWP integrations, optimizing transaction workflows and expanding platform investment capabilities.
- Revamped the entire application UI by migrating from the legacy interface to a modern Flutter-based user interface, significantly improving usability and UI consistency.
- Designed and implemented reusable Flutter widgets and UI components, enabling faster feature development and improved code maintainability.
- Managed end-to-end Flutter app deployment for Android and iOS, covering app signing, store submissions, and release builds.
- Integrated Firebase Push Notifications to deliver real-time updates and alerts to users.
- Supported web platform enhancements alongside mobile feature development to ensure consistent functionality across applications.
- Collaborated with cross-functional teams using Git-based workflows for version control and code reviews.

Software Developer | Oneyes Infotech Solutions

Jul 2024 - Jan 2025, Chennai, India

- Developed and maintained RESTful APIs using Django REST Framework for an Employee Self Service (ESS) platform.
- Built backend modules including Authentication, Attendance Management, Chat System, and Employee Profile Management.
- Contributed to API integration and frontend coordination to ensure seamless interaction between backend services and user interfaces.
- Participated in backend business logic implementation and database management for scalable data handling.

PROJECTS

FinFlow | Flutter, Provider

- Developed a cross-platform fintech trading mobile application using Flutter with a focus on performance and responsive UI design.
- Implemented Provider for efficient state management and optimized UI updates.
- Integrated secure RESTful APIs for reliable transaction processing and real-time data synchronization.

Final Academic Project | A Novel Hunger Management System To Avoid Food Wastage | Flask, MySQL

- Developed a web-based food donation platform to reduce food wastage by connecting food donors with people in need.
- Implemented user authentication and role-based features allowing donors to post surplus food and recipients to request donations.
- Built the application using Flask for backend development and MySQL for database management.

CERTIFICATIONS

- IBM Corporation: Cloud App Development : Back-End (Python, Flask), Front-End (HTML, CSS), Database (Cloud DB2). Issued On- July 2023 (Verification Code: NMCAD03EN).
- EduPrep : Python. Issued On- July 2023 (Verification Code: UT9CZP2Z).
- Infosys Springboard : Full Stack Development. Node.js, Angular, Mongo DB. Issued On- Nov 2022.
