## PROFILE

Flutter Developer with 2 year of experience in building cross-platform mobile applications for Android and iOS using Flutter and Dart. Strong understanding of mobile UI/UX, RESTful APIs, Firebase integration, and state management. Skilled in the full app development lifecycle from requirement analysis to deployment. Adept at writing clean, maintainable, and efficient code with a focus on performance.

---

## TECHNICAL SKILLS

- **Programming Languages:** Dart, Python FastAPI Framework, MySQL, HTML, CSS
- **Frameworks & Libraries:** Flutter, Firebase, Provider, Riverpod (optional), Google Maps SDK, Payment Gateway Integration (Razorpay/Stripe)
- **Mobile Development:**  
Cross-platform app development using Flutter for Android & iOS  
Flutter Flavors setup for multiple environments (e.g., dev, staging, production)
- **API & Backend Integration:**  
REST API integration  
Firebase Authentication, Firestore, Cloud Storage  
S4Hana API integration
- **Deployment:**  
SAP BTP deployment knowledge  
App deployment to Play Store and App Store  
Firebase Hosting for Flutter Web
- **Tools & Platforms:** Android Studio, Visual Studio Code, Xcode, Git, Firebase Console,
- **UI/UX:**  
Responsive UI design  
Material Design principles

---

## SOFT SKILLS

- Communication
- Leadership
- Team work
- Time Management

## PROJECTS

### **GSUS Star Technologies Pvt, Rajapalayam, Tamil Nadu**

**Role:** Front end developer

**Technologies Used:** Flutter, SAP

**Project:** Order Management System (B2B)

**Responsibilities:**

- Designed and implemented a B2B web application integrated with SAP to optimize order management.
- Impact: Improved order processing efficiency by 25% and minimized manual errors.

### **GSUS Star Technologies Pvt, Rajapalayam, Tamil Nadu**

**Role:** Full Stack developer

**Technologies Used:** Flutter, Firebase, Google Maps API.

**Project:** Work Track Management Application

**Platforms:** Android & IOS

**Responsibilities:**

**Shift-Based Attendance Management**

The app supports multiple shifts (day/night/custom) with a punch-in/out system. It timestamps entries and alerts supervisors if employees log time outside their assigned shifts.

**Image Capture for Proof of Work**

Employees upload selfies during punch-in to verify identity. This prevents proxy attendance and improves accountability.

**Real-Time Location Tracking via Maps**

The app records GPS location during punch-in/out and displays it on a map, helping admins track employee movements in real time.

**Task Assignment and Completion Tracking**

Daily tasks are assigned with deadlines and priorities. Employees can update status with comments, and admins receive instant notifications on progress.

**Leave and Overtime Management**

Employees can apply for leave through the app. Overtime is auto-calculated based on shift rules, and a leave calendar helps with planning.

**Payroll-Linked Time Logging**

Work hours, overtime, and leaves are integrated with payroll. Reports can be exported for easy salary processing.

### **GSUS Star Technologies Pvt, Rajapalayam, Tamil Nadu**

**Role:** Full Stack developer

**Technologies Used:** Flutter, Firebase, Payment Gateway API

**Project:** Meat App Application

**Responsibilities:**

Developed two cross-platform apps – one for customers and one for delivery partners – using Flutter. Included features like online booking, real-time delivery tracking, and Razorpay payment integration.

Dual app system with role-based UI/UX

Secure payments via Razorpay

Real-time location & order tracking

Deployed on Android & iOS

Clean architecture & scalable code

---

## **GSUS Star Technologies Pvt, Rajapalayam, Tamil Nadu**

**Role:** Full Stack developer

**Technologies Used:** Flutter, Python, Stripe Payment Gateway, PostgreSQL

**Project:** Wellness & Booking Platform App

### **Responsibilities:**

- Developed a cross-platform Flutter application for android and iOS with three roles (Seeker, Practitioner, Center) implementing role-based UI/UX and access control.
- Implemented a subscription-based booking system with feature restrictions, interactive calendar scheduling, and wellness service management (e.g., yoga sessions).
- Integrated Stripe payment gateway for secure subscriptions and one-time payments.
- Built and maintained backend REST APIs using Python, managing authentication, bookings, subscriptions, and payments.
- Delivered the entire solution independently, from frontend and backend development to Android & iOS deployment, following clean and scalable architecture.

## EXPERIENCE (INTERN)

### Tech Mahindra Ltd., (Dec 2023)

Learn Data Structure and algorithms implement in python and doing project work like super market bill generation using python, flask and mysql.

### Srimax Software Technology

Developed and implemented new features and functionalities as a web application developer, resulting in a 20% increase in user.

---

## EDUCATION

### PG - MCA

Anna University BIT CAMPUS, Tiruchirapalli | 2021 - 2023 | 75%

### UG - BSC(CS)

Ayya Nadar Janaki Ammal College, Sivakasi | 2018 - 2021 | 72%

### HSC

N.A.Annappa Raja Memorial Higher Secondary School, Rajapalayam | 2016 - 2018 | 74.83%

### SSLC

AKDR Boys School , Rajapalayam | 2015 - 2016 | 83.5%

---

## CERTIFICATIONS

- Internship Completion Certificate from TECH Mahindra Ltd., India 2023
  - Certificate of project completion from Srimax Software Technology 2023
  - Department of technical education 2014 Junior Typewriting English SECOND CLASS
