SUMMARY

Experienced Backend Developer with over 3 years of hands-on experience in building scalable applications using Laravel (PHP) and RESTful APIs. Strong background in designing and managing databases with MySQL and MongoDB, supporting backend systems for 500+ users. Gained practical experience developing backend services using Java in Eclipse IDE, delivering secure, high-performance solutions through cross-functional collaboration.

SKILLS

- Programming Languages: Core Java, PHP, JavaScript
- Frameworks & Libraries: Spring Boot, Laravel
- Web Technologies: HTML, CSS
- Databases: MySQL
- Development Tools: Eclipse IDE, Visual Studio

PROJECT

HRBluSky - Comprehensive HR Management Platform

Pruvity HR Solutions Pvt Ltd

- Technologies: Laravel (PHP), RESTful APIs, Node.js.
- Frontend: Developed a cross-platform mobile application using Flutter.
- Target Users: Schools and corporate offices.

EXPERIENCE

Associate Software Developer

Pruvity HR Solutions Pvt Ltd

January 2022 - March 2025, Madurai

- Designed and developed a scalable HR management platform supporting attendance, time-Off Management, claims, loans, and employee documentation using Laravel PHP and RESTful APIs.
- Implemented an Attendance Management module to manage shift rosters, track real-time employee locations via a custom tracker application, automate time exception requests, and integrate attendance data with payroll processing.
- Built a Time-Off Management system supporting categorized absences (Casual, Medical, Earned, Unpaid) with real-time request submission, approval workflows, and status tracking.
- Developed a Claim Management module enabling employees to submit reimbursement claims (travel, food, etc.) with multiple payout options including cash, bank transfer, and payroll, along with filtering and tracking features.
- Engineered a Loan Management module allowing HR teams to define custom loan types, configure salary deduction percentages, manage pre-closures, and automate real-time loan balance adjustments.
- Created an HR Document Management system to generate, manage, and securely distribute official documents such as offer letters, payslips, and memos using role-based access control.
- Implemented a Custom Forms module enabling HR teams to design dynamic onboarding and feedback forms using a drag-and-drop interface with configurable fields and workflows.
- Developed an administrative dashboard consolidating pending attendance, time-off, and claim requests with bulk approval and rejection features to streamline HR operations.
- Built an Organization Setup module to onboard new organizations with configurable team hierarchies, role-based permissions, and module-level approval workflows.
- Implemented a bulk upload feature allowing HR teams to import large employee datasets using Excel templates for attendance, employee profiles, and job details, ensuring efficient data migration and validation.

EDUCATION

Bachelor of Engineering - Electronics and Communication Engineering

K.L.N College of Information Technology • 2016 - 2020 • 65%

CERTIFICATIONS

Post Graduate Diploma in Computer Applications (PGDCA)

CCI Institute

PHP and MYSQL Course Certificate

SSI Institute

Pursuing - Java Full Stack With React

Q Spiders Institute
