

VIDHYA M

7550205951 | vidhyamurali1203@gmail.com

Objective

Motivated and detail-oriented professional transitioning into the IT industry with strong knowledge of Java, SQL, Spring Boot, and web development. Completed Full Stack Development training and passionate about building scalable web applications. Seeking an opportunity as a Java Developer to apply my technical skills and grow in a dynamic software development environment.

Experience

- PROCHANT** 1/7/2022 - 19/3/2024
Process Associate
 - * Managed patient intake and insurance verification.
 - * Performed front-end billing activities using Brightree software.
 - * Created and submitted claims to insurance payers.
 - * Verified patient demographics and insurance eligibility.
 - * Coordinated with clients for documentation and claim requirements.
 - * Ensured accurate data entry and claim submission to avoid denials.
- ACCESS HEALTHCARE** 20/3/2024 -
Senior Client Partner – Payment Posting Analyst
 - * Posting insurance and patient payments accurately into billing systems.
 - * Reviewing and analyzing EOBs (Explanation of Benefits).
 - * Handling unapplied and unidentified cash transactions.
 - * Processing credit card payments and reconciling accounts.
 - * Coordinating with AR and Billing teams for claim clarifications.
 - * Maintaining daily productivity and quality targets.

Education

- Sri Venkateswara College of Technology** 2017-2021
B.E (ECE)

Projects

- Bus Reservation System**
(Java,OOPs,IntelliJ idea,Git &GitHub)
 - * Developed a console-based Bus Reservation System using Java to simulate the process of booking bus tickets.
 - * Implemented features such as seat availability checking, booking confirmation, and user menu options
 - * Used Object-Oriented Programming concepts like classes, objects, and methods to organize the application.
 - * Implemented user input handling using Scanner and loop-based menu navigation for booking and exiting the system.
 - * Designed classes such as Main, Bus, and Booking to manage reservation logic.
- Actodo – Todo List Web Application**
(React JS, Tailwind,React Router, React useState, Vercel)

- * Developed a fully functional Todo List web application that allows users to add and delete activities dynamically.
- * Utilized React JS for the frontend, React Router for navigation, and the useState hook for state management.
- * The application is deployed on Vercel for seamless, production-grade hosting. This project demonstrates proficiency in React fundamentals, routing, and modern web deployment practices.
