QUALITY ASSURANCE ENGINEER

9597773742 • itsmekishore98@gmail.com • linkedin.com/in/kishore-subramanian-b1ab9726a

Quality Analyst with 3+ years of experience in Manual and Automation Testing for web and mobile applications. Skilled in functional, regression, API, and integration testing across e-commerce and enterprise platforms. Experienced in automation frameworks using Java Selenium and Cypress, improving regression efficiency and reducing manual effort. Proficient in defect management, test planning, and Agile methodologies, with a strong focus on delivering high-quality and scalable software solutions.

Technical Skills

- **Testing Skills:** Functional Testing, Regression Testing, Integration Testing, User Acceptance Testing (UAT), Mobile Application Testing (Android & iOS).
- **Automation Testing:** Selenium WebDriver (Java), Cypress, TestNG, Cucumber (Gherkin), Page Object Model (POM), Data-Driven Framework, Test Automation Framework Design.
- **API Testing:** Postman, API request/response validation, JSON validation
- **Testing Tools:** JIRA, BrowserStack, Redmine, ClickUp, Linear.
- **Methodologies:** Agile(Scrum), Waterfall

Professional Experience

RedBlox Technologies Solutions Pvt. Ltd.

(03/2025)-(Present)

- Perform manual and automation testing for web applications using Selenium WebDriver (Java) and Cypress to validate critical business workflows.
- Develop and maintain automation scripts for regression testing, reducing manual testing effort and improving release efficiency.
- Design and execute test cases, test scenarios, and test data to ensure end-to-end functionality and application stability.
- Track and manage defects using Redmine, collaborating closely with developers to ensure timely resolution.
- Mentor junior testers and interns, providing guidance on manual testing practices, automation basics, and defect reporting standards.
- Review test cases and automation scripts created by junior team members to ensure quality and consistency in testing deliverables.

iKomet Technologies Solutions Pvt. Ltd.

(07/2024)-(01/2025)

- Conducted manual UI/UX testing for both web and mobile applications, ensuring consistent functionality across platforms.
- Identified and reported critical usability and functional defects, improving overall user experience.
- Collaborated with development teams to document test plans, test cases, and defect reports.
- Supported early automation adoption discussions and assisted in identifying test scenarios suitable for automation.

- Actively participated in Agile ceremonies including sprint planning, daily stand-ups, and sprint reviews.

Askan Technologies Pvt. Ltd.

(02/2022)-(03/2024)

- Executed functional, regression, and integration testing for multiple e-commerce platforms, ensuring stable releases.
- Designed and executed comprehensive test cases and test scenarios, improving test coverage across application modules.
- Collaborated with developers to identify, document, and track defects, ensuring faster resolution and improved product stability.
- Developed foundational automation testing knowledge and contributed to discussions around automation framework implementation.

Key Projects

Swypatune(URL: www.myswypatune.com)

- Performed end-to-end testing of the Swypatune mobile app on Android and iOS, covering functional, UI, and regression scenarios.
- Validated and managed backend testing through the Laravel admin dashboard, ensuring accurate API and data flow.
- Reported and tracked 10+ critical issues, contributing to a significant reduction in live production bugs after deployment.
- Collaborated with developers and clients to deliver stable app releases and improve payment workflow via Webhook implementation.

Sleep and Health – Mobile Application

- Performed end-to-end manual testing of the mobile application on Android and iOS platforms to ensure smooth user experience.
- Validated core modules including Sleep, Drink, Food, Activity, and Medicine tracking for functionality and usability.
- Designed and executed test cases for user workflows, ensuring accurate data tracking and system reliability.
- Identified and reported defects using Jira, collaborating with developers for timely resolution.

Gohavn – Multi-Tenant Web Application

- Automated Admin Dashboard workflows using Cypress, covering critical tenant and user management modules.
- Implemented smoke test automation to validate key application flows after every deployment.
- Built CI/CD pipeline to automatically trigger tests when code is pushed to development or production branches.
- Integrated automation execution with Amazon Web Services to detect critical blockers early and ensure stable releases.

LaundryHub(URL: *laundryhub.me*)

- Led manual and automation testing for web and mobile applications used by Admins, Vendors, Drivers, and End Users.
- Performed mobile testing on Android and iOS ensuring compatibility and performance.
- Executed API validation using Postman for backend integrations.
- Improved overall product usability, contributing to 20% improvement in user satisfaction.

Virtual Tryon(URL: *miafashion.redblox.io*)

- Performed end-to-end functional and UI testing for core modules including Login, Registration, Chatbot, and Try-On features.
- Tested the AI-based Virtual Try-On flow where users upload real images to try outfits from brands like Farfetch, Mango, and Zara.
- Validated chatbot functionality for recommending dresses for various occasions such as parties, travel, and casual wear.

Ulamart (URL: *ulamart.com*)

- Led manual testing for the web and mobile applications, verifying the shopping cart, checkout process, and user account management.
- Performed API testing to ensure reliable communication between front-end and back-end systems.
- Conducted mobile application testing on both Android and iOS platforms to ensure seamless functionality.
- Documented usability feedback that led to enhancements in the user interface, contributing to a 30% increase in customer engagement.

Education

Bachelor Of Computer Application (BCA), Thiruvalluvar University

(2015) - (2018)

Key Achievements

Team excellence in 2023 - Recognized for improving API testing processes, leading to a 25% decrease in reported issues post-launch.
