SUMMARY

Results-driven **Software Engineer** and **PHP Laravel Developer** with 2+ years of experience building scalable web applications across education, fintech, travel booking (B2C), and enterprise inventory systems. Skilled in PHP, Laravel, Angular, JavaScript, MYSQL, and RESTful API development, with experience integrating third-party services such as payment gateways and SendGrid. Strong background in migrating legacy Core PHP applications to modern Laravel architecture and optimizing API and database performance.

EXPERIENCE

Twilight IT Solutions

2024 - Present Puducherry, India

- Developed and maintained a travel booking platform to manage tour packages, customer reservations, and booking workflows using Laravel
- Designed responsive user interfaces using Tailwind CSS and built interactive components with Alpine.js to enhance user experience
- Designed and optimized MySQL database schemas for efficient handling of booking, customer, and transaction data
- Integrated REST APIs and contributed to end-to-end feature development, including admin panel and booking management modules, ensuring smooth system performance
- Developed and maintained a B2C travel booking platform using Laravel and React.
- Built dynamic and responsive user interfaces using React, Tailwind CSS, and Alpine.js.
- Designed and optimized RESTful APIs for seamless frontend-backend communication.
- Managed MySQL database design and performance optimization.
- Implemented authentication, role-based access control, and booking workflows.
- Integrated third-party services such as payment gateways and email services.
- Developed and maintained admin dashboards and reporting tools.
- Migrated applications from Laravel 5 to Laravel 10 with improved architecture.
- Converted legacy Core PHP code into scalable Laravel modules.
- Enhanced API integrations and frontend components.
- Improved system performance, security, and maintainability.
- Integrated SendGrid email services and automated workflows.

EDUCATION

Bachelor of Science (B.Sc.)

Thiruvalluvar University, Vellore

09/2019 - 06/2023 Bommayapālaiyam, India

LANGUAGES

Tamil	Native	English	Intermediate
-------	--------	---------	--------------

INTERESTS

-  Interested in Artificial Intelligence and AI-powered application development
-  Hands-on experience with Gemini AI API integration in real-world projects

SKILLS

PHP	Laravel	REST	Angular
MVC	Core PHP	WordPress	
Bootstrap	HTML	Tailwind CSS	
GitLab	Git	JavaScript	CSS

PROJECTS

My Paris Trip

B2C travel booking platform

- Developed and maintained a travel booking platform to manage tour packages, customer reservations, and booking workflows using Laravel
- Designed responsive user interfaces using Tailwind CSS and built interactive components with Alpine.js to enhance user experience
- Designed and optimized MySQL database schemas for efficient handling of booking, customer, and transaction data
- Integrated REST APIs and contributed to end-to-end feature development, including admin panel and booking management modules, ensuring smooth system performance

SSM - Sahinler Smart Management System

Enterprise application for textile industry operations

- Migrated large-scale application from Laravel 5 to Laravel 10
- Rewrote legacy Core PHP modules into Laravel 10 standards
- Enhanced API integrations and email workflows using SendGrid
- Improved code quality, security, and performance through refactoring

Blooms Academy

Learning Management System for educational institutions

- Built and maintained back-end functionalities for an LMS supporting course creation and student tracking
- Optimized MySQL database for efficient storage and retrieval of course and assessment data
- Integrated APIs for real-time feedback and interactive content delivery
- Ensured scalability and performance through rigorous testing and code optimization
