Professional Summary

Junior Software Developer with hands-on experience building and maintaining B2B web applications using Angular and PHP (Laravel). Skilled in full-stack development, database design, REST API integration, and Agile workflows. Proven ability to contribute across the complete development lifecycle and deliver scalable, user-centric solutions.

Skills

Frontend Technologies

- HTML, CSS, JavaScript, TypeScript, Angular, React, jQuery

Backend Technologies

- Core PHP, Laravel, CakePHP, Python, Django, Node.js, Express.js

Databases

- MySQL, MongoDB, PostgreSQL, SQL, phpMyAdmin

Tools & Platforms

- Git, GitHub, Bitbucket, Jira, XAMPP, Postman (API Development and Testing)

Other Skills

- Microsoft Excel, Microsoft Word

Experience

Junior Software Developer

09/2024 – Present

Matex Technologies Private Limited

Chennai, Tamil Nadu

- Contributed to end-to-end development of multiple B2B e-auction platform applications (Proctek, ILFS).
- Developed frontend modules using Angular, TypeScript, and jQuery; implemented backend functionality using PHP and Laravel.
- Tested and validated REST APIs using Postman; managed source code using Git and Bitbucket.
- Participated in Agile ceremonies using Jira for sprint planning, task tracking, and daily updates.
- Collaborated with cross-functional teams to deliver secure and scalable B2B solutions.

PHP Developer Intern

05/2024 – 09/2024

Matex Technologies Private Limited

Chennai, Tamil Nadu

- Developed backend functionality using PHP and Laravel for internal and client-facing applications.
- Built responsive UIs using Angular and TypeScript; managed MySQL databases via phpMyAdmin.

- Utilized XAMPP for local development, testing, and debugging.
- Wrote clean, documented code following industry best practices throughout the full project lifecycle.

Projects

BlogSphere

Technologies: Laravel, PHP, MySQL, jQuery, AJAX, HTML, CSS

- Built a full-stack blog platform with Blogger and Admin panels using Laravel MVC architecture.
- Implemented role-based authentication, REST APIs, email notifications, and Eloquent ORM for performance optimization.

User Registry

Technologies: Core PHP, SQL, MySQL, phpMyAdmin, JavaScript

- Developed a role-based user management system with secure session-based authentication and admin panel.
- Applied client-side (JavaScript) and server-side (PHP PDO) validation; used phpdotenv for secure config management.

Food Ordering System

Technologies: SQL, MySQL

- Designed a normalized relational database schema for restaurant operations including orders, payments, and reporting.

Personal Portfolio

Technologies: HTML, CSS

- Built a structured portfolio website using semantic HTML with consistent styling and accessibility best practices.

Education

Bachelor of Engineering
