Pune, Maharashtra

Professional Summary

Flutter Developer / Software Developer with 1.5+ years of experience in developing cross-platform mobile applications using Flutter and Dart. Skilled in building responsive and user-friendly UI, integrating REST APIs, working with Firebase, and implementing MVVM/MVC architecture with Provider and Riverpod state management. Promoted from Software Developer Intern to Software Developer based on strong performance. Proficient in Git/GitHub, Jira, and Postman, with hands-on experience contributing to live application deployment on the Google Play Store.

Work Experience

Android and Flutter Developer

Time Dignitor Built Pvt Ltd | Pune

Jun 2025 – Present

- Promoted from Software Developer Intern to Software Developer based on excellent performance and successful completion of the trainee period.
- Developed cross-platform mobile applications for Android and iOS using Flutter and Dart.
- Developed and maintained the 'Everyone @Service' service marketplace application using Flutter.
- Built responsive and user-friendly UI with optimized application performance.
- Integrated REST APIs and Firebase services for real-time data handling and authentication.
- Collaborated with cross-functional teams for feature development, testing, and deployment.
- Worked with Git/GitHub, Jira, and Postman for version control, task management, and API testing.
- Contributed to the successful deployment and maintenance of live applications on the Google Play Store.

Software Developer Intern

Updatus Inc. Software Pvt. Ltd. | Remote

Sep 2024 – Mar 2025

- Designed and developed 10+ responsive UI screens using Flutter for a cross-platform e-commerce application (Android/iOS).
- Integrated Firebase for user authentication and real-time database management.
- Consumed REST APIs to fetch and display dynamic application data efficiently.
- Implemented Riverpod state management for scalable and maintainable application architecture.
- Worked with Git/GitHub for version control and Jira for task and sprint management.
- Participated in Agile development processes, including daily stand-ups, sprint reviews, and code reviews.

Projects

Everyone @Service | Team Project | Jun 2025 – Present

Developed EveryOne @ Service, a Flutter-based service marketplace application where service providers can register and publish their services on the platform.

Implemented user login and registration functionality with REST API integration for dynamic data handling.
Enabled users to directly connect with service providers without any third-party involvement.
Built responsive cross-platform UI using Flutter and Dart.
