PROFESSIONAL SUMMARY

Detail-oriented QA Engineer with a B.E in Electronics and Communication. Strong foundation in SDLC,STLC and Defect Life Cycle. Proficient in executing SQL queries for backend validation. Certified by Qspiders and ready to contribute to high quality software delivery.

EDUCATION

2021 – 2025	B.E - Electronics and Communication Engineering PSNA College of Engineering and Technology CGPA - 8
2020 – 2021	HSC Syed Ammal Matriculation Boys Hr Sec School Marks in Percentage - 90.17
2018 – 2019	SSLC Syed Ammal Matriculation Boys Hr Sec School Marks in Percentage - 85.8

TECHNICAL SKILLS

Manual Testing

- Models of testing, Life Cycles in Testing(SDLC, STLC, DLC), Type of testing
- Experienced in designing Test Scenarios and executing Test Cases based on functional requirements.
- Proficient in Defect Life Cycle management, reporting bugs with proper Severity and Priority.

Database Management SQL

- Proficient in performing CRUD operations using SELECT, INSERT, UPDATE, and DELETE statements.
- Strong understanding of Joins, Sub-queries, and data sorting for efficient backend validation.
- Familiar with database schema concepts including Primary Keys, Foreign Keys, and Integrity Constraints

Automation Testing

- Hands-on experience with Selenium WebDriver for automating web applications using Java.
- Proficient in locating web elements using XPath, CSS Selectors, ID, and Name to create robust scripts.
- Skilled in writing, debugging, and executing automation test scripts across different web browsers

PROJECTS

2025	Manual Testing – End-to-End Quality Assurance & Functional Validation (Rapido Web Application) • Designed and executed 25+ test cases for login, cart, and checkout modules. • Performed functional and UI testing to validate application features. • Identified and reported defects using bug tracking tools. • Conducted regression testing to ensure stability after bug fixes. • Tools used: Jira, TestLink, Excel
2024	CHILD SAFETY APPLICATION Created an application and a hardware kit using IoT kits for child safety. • IoT Hardware Kit: The kit includes sensors and devices such as GPS trackers, motion detectors, and proximity sensors, which can be attached to a child's belongings or worn by the child. • Real-Time Tracking: The application provides parents with real-time location tracking of their children, ensuring they can monitor their whereabouts at all times.
