CAREER OBJECTIVE

Enthusiastic Full Stack Java Developer and Computer Science Engineering student with hands-on experience in web and mobile application development. Skilled in Java, Spring Boot, React.js, and Android (Kotlin). Seeking a software development role to apply strong backend and frontend expertise to build scalable, efficient applications.

TECHNICAL SKILLS

Programming: Java (OOPs, Collections, Exception Handling, Multithreading), Kotlin, Dart(Flutter)

Frameworks: Spring Boot (REST APIs, MVC Architecture), React.js (Hooks, State Management, Components), Node.js, Express.js, Flutter(Widgets, Navigation, API)

Web Technologies: HTML5, CSS3, JavaScript (ES6+), Bootstrap

Mobile Development: Android (Kotlin, XML, Activity Lifecycle, SQLite Integration), Flutter(UI Design, State Management)

Databases: MySQL, SQLite, MongoDB (CRUD Operations, Joins, Queries)

Tools & Platforms: Git, GitHub, VS Code, Eclipse, Android Studio, Postman

Core Concepts: REST API Design, MVC Architecture, OOP Principles, Agile Development

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | Besant Technologies, Chennai

Dec 2025 – Present

- Developed and maintained web applications using Java and Spring Boot with MVC architecture
- Designed, optimized, and managed MySQL database schemas for production applications
- Built RESTful APIs and integrated React.js frontend with Spring Boot backend
- Created responsive user interfaces using Bootstrap ensuring cross-browser compatibility

Mobile Application Development Intern | eQuadriga Software, Trichy

Sep 2024

- Developed Android application modules including UI screens and navigation flow using Kotlin and XML
- Designed and implemented SQLite database for user management and activity tracking
- Built secure entry/exit logging system and admin dashboard with performance optimizations

PROJECTS

Smart-Mess – Inventory Optimization System | Tech: Java, Spring Boot, React.js, MySQL, REST APIs

- Built a full-stack ERP system for hostel food inventory management covering meal planning, vendor management, and stock tracking
- Implemented demand forecasting algorithms to predict daily consumption and reduce food wastage significantly
- Designed RESTful APIs with Spring Boot and developed dynamic React.js dashboards with real-time stock alerts and consumption reports

BlackPearl – Shipyard Management System | Tech: Java, Spring Boot, MySQL, HTML, CSS, JavaScript

- Developed a logistics management system for end-to-end shipment tracking, stock control, and port operations handling
- Built role-based admin dashboard with analytics, shipment status updates, and inventory reports using Spring Boot and MySQL
- Implemented secure authentication with role-based access for admin, manager, and staff user levels

RevTrack – Vehicle Service Management System | Tech: React.js, Spring Boot, MySQL, REST APIs

- Built a vehicle service platform with automated reminders, maintenance scheduling, and customer/vehicle record management
- Integrated PDF report generation for invoices, service summaries, and billing using REST APIs

Hostel Lock System – Android Access Tracking | Tech: Kotlin, XML, SQLite

- Developed an Android app for hostel access control with ID-based entry/exit tracking and timestamp logging
- Implemented SQLite database to store student records, access logs, and daily movement history locally on-device
- Built admin interface for real-time monitoring of access events and generation of daily entry/exit summary reports

CERTIFICATIONS

- Full Stack Development Trainee – Besant Technologies
- Frontend Development Certification – Besant Technologies
- SQL Certification – Besant Technologies
- Full Stack Development Certification – Besant Technologies

EDUCATION

B.E. Computer Science Engineering | Indra Ganesan College of Engineering

CGPA: 8.31 | 2022 – 2026

Higher Secondary (HSC)

77% | 2020 – 2022

Secondary School (SSLC)

89% | 2020
