Summary:

Full Stack Developer with hands-on experience in MERN Stack (MongoDB, Express.js, React.js, Node.js), PHP, Python, and MySQL. Skilled in developing scalable web applications, RESTful APIs, and responsive user interfaces. Strong foundation in Object-Oriented Programming (OOP). Experienced in integrating AI-driven features into production applications. Seeking an entry-level Software Engineer role.

EDUCATION

Adhiyamaan College of Engineering

Master of Computer Application

8.0/10.0(CGPA)

(Sep 2024 – Apr 2026)

KMG College of Arts & Science

B.Sc, Computer Science

8.0/10.0(CGPA)

(Jun 2021 – May 2024)

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Typescript, PHP

Frontend Frameworks: React.js, HTML5, CSS3, Tailwind CSS

Backend Technologies: Node.js, Express.js, RESTful APIs, Server-Side Scripting

Databases: MySQL, MongoDB

Tools: Git, GitHub, Postman, VS Code

AI Integration: GroqAI, Web Speech API

Soft Skills: Junior Typist, Good Communication Skills, Team Collaboration

EXPERIENCE

Technical Intern

(December 2025 – April 2026)

KeyKoders

Tambaram, Chennai

- Developed responsive web applications using PHP, HTML, CSS, JavaScript, and MERN stack technologies, delivering scalable and user-friendly solutions.
- Built and maintained RESTful APIs, MySQL databases, and integrated frontend and backend systems for efficient data handling and application performance.
- Conducted technical training and development sessions while delivering PHP-based projects integrated for the Trainers Hub platform, enhancing practical learning and project execution.

Web Developer (Internship)

(July 2025 – August 2025)

Apex Planet

Remote

- Developed responsive and dynamic web applications using PHP, MySQL, HTML, CSS, JavaScript, and REST-based workflows.
- Designed and optimized relational databases, SQL queries, and backend functionality to improve application performance and scalability.
- Implemented CRUD operations, form validation, server-side scripting, and debugging techniques to ensure secure and efficient web application.

PROJECTS

Farmchainx | React.js, Node.js, Express.js, SQL, GroqAI

Github: github.com/manojkumar-k28/farmchainx

- Built a full-stack web application using React.js, Node.js, Express.js, and SQL for seamless frontend-backend integration.
- Integrated GroqAI to implement AI-driven data processing, analytics, and workflow automation features.

Fintracker | React.js, Node.js, Express.js, MongoDB, Web Speech API

Github: github.com/manojkumar-k28/fintracker

- Built a MERN-based personal finance tracking application enabling users to manage expenses, budgets and transaction history efficiently.
- Integrated voice-enabled navigation and expense entry using the Web Speech Recognition API, enhancing accessibility and user interaction.
