ACADEMIC PROJECT

Farmer's Market App

An Android app using Jetpack Compose that connects farmers and consumers directly, removing middlemen. Farmers can list products and manage orders; consumers can browse, order, and chat. Key Features: Clean UI, Firebase login Real-time listings, chat, orders Firebase Firestore backend Promotes local farming and direct farm-to-home delivery

INTERNSHIP PROJECT

Book Resale And Exchange System

A full-stack web app that connects book owners and readers to buy or exchange used books directly without intermediaries. Users can list and browse books, negotiate prices through a counter-offer system, and communicate via real-time chat. It features a clean responsive UI, secure JWT-based authentication with email verification, and real-time updates using Socket.IO. Backed by MongoDB for managing users, listings, chats, and transactions, the platform promotes affordable access to books and sustainability through community-driven reuse.

CERTIFICATION
