Objective

Seeking a challenging developer role where I can apply my expertise in software development, strong problem-solving abilities, and enthusiasm for learning emerging technologies to deliver innovative solutions, drive business growth, and contribute to team success.

Experience

- Intern, Proz Solutions

Aug 2022 – Apr 2023
Namakkal

 - Developed **CRUD applications** using Core PHP to streamline and automate data handling processes.
 - Designed secure **REST APIs in Laravel** to improve system integration and enhance data protection.
 - Optimized **SQL queries** to improve data retrieval efficiency and overall application performance.
- Instiqa, Full Stack Developer

Nov 2023 – Present
Chennai

 - Delivered end-to-end full-stack solutions across frontend, backend, and database layers for client projects.
 - Integrated third-party services such as **Stripe, Sage**, and **JobNimbus** to enable seamless payment and automation workflows.
 - Managed application hosting and deployments on **DigitalOcean, SiteGround**, and **cPanel**, ensuring high availability and reliable system performance.

Education

- BCA, Srimad Andavan Arts & Science College

Jun 2018 – Apr 2021
Trichy
- M.Sc - Computer Science, Arignar Anna Govt Arts College

Jun 2021 – Apr 2023
Namakkal

Skills

- PHP
 - Next JS
 - jQuery
 - Digital Ocean
 - Git

- Laravel
 - React JS
 - SQL
 - Site Ground

- Lumen
 - JavaScript
 - Rest API's
 - cPanel

Projects

Enareem

- Architected a wellness technology platform combining e-commerce with a credit-based model for red light therapy.
- Engineered secure transactions, seamless booking workflows, and credit tracking to boost user engagement.
- Incorporated third-party APIs and crafted an intuitive UI, demonstrating full-stack expertise in health tech.

Intennis

- Launched a SaaS platform for sports clubs with dedicated coach and student mobile apps and an admin dashboard.
- Introduced event scheduling, performance journals, rewards, and push notifications to enrich user interaction.
- Enabled real-time communication and advanced administration tools, delivering a unified sports management experience.

Indie Sport

- Built a web platform connecting athletes and clubs with sponsors to streamline sponsorship requests.
- Curated structured campaign flows for individuals and clubs through a simple, intuitive interface.
- Implemented **Stripe** for secure payment processing, showcasing expertise in funding-focused digital solutions.

Workers Park

- Created a real estate platform linking users with service providers through a centralized digital portal.
- Enabled admin-controlled property listings to improve accessibility and housing information management.
- Improved transparency and operational efficiency by simplifying real estate interactions.

Barrow Electrical

- Engineered a backend system for workforce and operations management for an electrical services company.
- Delivered modules for attendance, leave tracking, timesheets, and document management.
- Synced client financials with Sage for invoicing and estimates while streamlining job scheduling, asset reporting, and internal communication.

Ashmans

- Produced a content management system by integrating a WordPress backend with a Next.js frontend.
- Leveraged GraphQL to accelerate content delivery and enable dynamic, real-time updates.
- Elevated user experience with a responsive, high-performance, and SEO-friendly interface.
