D.O.B Marital : 24.04.1998
Status : Unmarried

PROFILE SUMMARY

Detail-oriented Software Engineer with hands-on experience in Automation Testing and strong knowledge of Core Java, OOP concepts, and basic Spring Boot development. Experienced in building and testing web applications using Selenium WebDriver with Java and TestNG, following Page Object Model (POM). Skilled in designing test cases, debugging issues, API testing using Postman, and SQL validation. Familiar with REST API development, Git, Maven, Agile methodology, and defect lifecycle management. Able to collaborate with cross-functional teams to deliver reliable and high-quality software solutions.

WORK EXPERIENCE

Besant Technologies 01.12.2024-PRESENT
Automation Testing - Training & Internship

Project: Hospital Appointment Booking System - Automation Testing

- Developed basic backend modules using Core Java and Spring Boot concepts for patient registration and appointment scheduling.
- Designed REST APIs for booking, rescheduling, and cancellation workflows and tested them using Postman.
- Worked with MySQL database for storing patient and appointment data and validated records using SQL queries.
- Worked with MySQL database for storing patient and appointment data and validated records using SQL queries.
- Implemented form validations and business logic for login, booking, and cancellation modules.
- Analyzed requirements and prepared test scenarios, test cases, and test data.
- Designed and documented manual test cases for patient registration, login, appointment booking, and cancellation workflows.
- Executed manual test cases and validated expected vs actual results.
- Automated end-to-end workflows using Selenium WebDriver with Java and TestNG following Page Object Model (POM).
- Converted manual test cases into automation scripts for functional and regression testing.
- Conducted functional, regression, and re-testing after application changes.
- Logged, tracked, and verified defects using JIRA following complete defect lifecycle.
- Performed basic API testing using Postman and Rest Assured and validated responses. Worked in Agile environment collaborating with developers to debug issues and improve application quality.

CORE COMPETENCE

- Core Java, OOP Concepts, Collections Framework
- Spring Boot, REST API Development
- Selenium WebDriver with Java & Python
- TestNG, Cucumber BDD, Page Object Model (POM)
- Manual Testing – Test Case Design, Functional & Regression Testing
- SQL & Database Testing (MySQL)
- API Testing using Postman & Rest Assured (Basics)
- JIRA – Defect Tracking & Test Management
- Agile Methodologies, SDLC, STLC
- Agile Methodologies, SDLC, STLC
- Git, Maven, Jenkins (Basics), CI/CD Pipeline
- Microsoft Excel, Google Sheets, Microsoft Word

RT-Pro Pvt Ltd Quality and Regulatory Engineer	05.12.2023-30.11.2024
• Worked as a QA Engineer in a startup environment, handling end-to-end quality activities. • Reviewed and maintained QA documentation in compliance with ISO 13485 and ISO 14971 standards. • Participated in software and system testing activities including functional testing and regression testing. • Prepared, reviewed, and validated test cases, test reports, and risk analysis documents. • Supported defect tracking, issue analysis, and verification of fixes. • Ensured adherence to quality processes across development and testing cycles. • Collaborated closely with development and management teams in a fast-paced startup setup.	
Schiller Healhcare India Pvt Ltd Customer Support Engineer	01.06.2021-30.11.2023
• Provided technical support for medical devices including troubleshooting, testing, and customer issue resolution. • Conducted device testing and validation during service activities to ensure product reliability. • Supported QA documentation activities including preparation and verification of DHF (Design History File) documents. • Reviewed test records, service data, and customer complaints to ensure compliance with quality standards. • Assisted QA team in audit preparation and document verification activities. • Acted as a bridge between service, QA, and engineering teams for issue tracking and resolution.	
Sri Vignesh Medi Equipment Service Engineer	02.05.2019-30.05.2021
• Installed, configured, and serviced medical devices at customer sites ensuring proper functionality and compliance with quality standards. • Performed functional testing and basic validation of medical equipment after installation and servicing. • Identified device issues, analyzed root causes, and coordinated corrective actions. • Verified QA documents, service reports, and complaint handling records as per internal quality procedures. • Maintained service logs, installation checklists, and preventive maintenance reports. • Collaborated with internal teams to ensure issues were resolved within defined timelines.
